Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML/CSS
Frameworks / Libraries: React, Next.js, FastAPI, SASS, Styled Components, Tailwind CSS, Vite
Cloud / DevOps: Git, GitHub, CI/CD, Cypress, NPM/Yarn, JIRA
Data: PostgreSQL, SQLAlchemy, Pydantic, Alembic, Redis, RESTful APIs

Experience

Full Stack Engineer, CH Software Solutions (Contract) — Nov 2021 – Present

- Design and build an async domain-driven backend with 18 feature modules using FastAPI, SQLAlchemy 2.0, and Pydantic v2, powering a production-ready travel planning API.
- Implement JWT authentication with access/refresh token rotation, bcrypt hashing, and 2FA email verification, structuring auth into dedicated submodules with full CRUD and schema layers.
- Engineer a complex relational data model with polymorphic packing items (base table + 5 specialized 1:1 detail tables), 6 many-to-many junctions, and SQLAlchemy string annotations to eliminate circular imports.

Engineer II, Agile Six Applications (VA.gov) — Sep 2025 – March 2026

- Engineer WCAG-compliant typeahead components with full ARIA support, live screen-reader announcements, and keyboard navigation, ensuring Section 508 accessibility compliance for veteran-facing services.
- Build a reusable, composable Autosuggest primitive with configurable sub-components and behavior hooks, standardizing search UX across multiple VA domains.

Front End Developer, Blue Telescope — Jan 2023 – Sep 2025

- Rebuild the company website with TypeScript and Next.js, cutting bundle size through server-side rendering, lazy loading, and code splitting.
- Build a full-stack headless internal CMS using Strapi with OAuth2 and OpenID Connect to securely manage Google Drive assets and streamline project management.

Front End Engineer, Wild Earth — Jan 2022 – Dec 2022

- Design and implement a product quiz that captures visitor emails and drives new subscription purchases, increasing customer acquisition for a Series C e-commerce platform.
- Build a product cancellation flow recommending alternative formulas, diverting clients to new purchases and improving retention for a $20M+ plant-based pet food brand.

Research Associate, Omniome — Jan 2020 – Nov 2021

- Build a remote DNA sequence monitoring dashboard with HTML, CSS, and JavaScript, visualizing real-time sequencing metrics and reagent consumption to identify excess use and catch leaks early.

Education

B.S. in Molecular Biology — California State University San Marcos, San Diego, CA — 2019
