Carly Hayter - Full Stack Engineer

San Diego, CA | 619 813 4322 | carlyhayter@proton.me | linkedin.com/in/carlymhayter | github.com/carlymhayter

EDUCATION

B.S. Molecular Biology (Magna Cum Laude, GPA 3.89) – *California State University San Marcos*

PROFESSIONAL EXPERIENCE

CH Software Solutions ***March 2026 - Current***
Fullstack Engineer - Freelance Remote, San Diego, CA

- Built full stack travel assistant platform for packing lists and product placement for client
  - Created a domain-driven backend, with **RESTful** API endpoints (**Python**/**FastAPI**). Async **SQLAlchemy** for **PostgreSQL** database to manage cascading user/packing list/traveler creation and edits
  - Enforced quality with a **CI/CD** pipeline built with **AWS**/**GitHub** Actions infrastructure. Quality gate consists of **Ruff, MyPy** and **Pytest** testing on the backend, and **ESLint, Mocha, Chai, TSC** on the frontend
  - Dedicated **staging/production environments** (**AWS** services used: **S3**, **CloudFront CDN**, **RDS**, **Elastic Beanstalk**, and **ElastiCache Redis**) to maintain production quality while rolling out features
  - Deployed **TypeScript/React/Redux/Redux Toolkit** frontend, with pessimistic UI updates
  - Crafted a custom auth layer with two login options: email/password login with **JWT/refresh token,** or **Google OIDC Authorization Code flow** with **PKCE**

Agile Six Applications, Inc ***Oct 2025 – March 2026***
Engineer II (Contract) Remote, San Diego, CA

- Delivered autosuggest input for a software contracting agency to modernize the Facility Locator on VA.gov
  - **Decreased the number of needed assistance/intervention events** from **3.2 to 0.5 per session** in moderated usability sessions (n=15, n=12) for blind users
  - Built in **TypeScript** with **Redux/Redux Toolkit** state management
  - **Ensured WCAG 2.1 AA** (Web Content Accessibility Guidelines) & **Section 508** (US Gov't Accessibility Compliance standards) **compliance**
- Expanded **Cypress** test coverage on Facility Locator from 78% to 91% by adding further edge test coverage

Blue Telescope ***Jan 2023 - Aug 2025***
Front End Developer Remote, San Diego, CA

- Built custom CMS for a $2.5M-revenue digital agency to manage 2000+ assets
  - Saved an estimated 10 hours per week of project producer time (**400-600$ estimated savings per week**)
  - Service built on **Next.js/TypeScript** frontend, with **Strapi** backend deployed on an **EC2** instance
  - Automatic webpage generator allowed PMs to generate marketing content/portfolio pages with 0 additional developer costs/time
- Created a **NestJS REST API** with 6 **Monday.com GraphQL** webhook endpoints, reducing project setup time from an average of 45 minutes to under 5 minutes per project, **eliminating coordination overhead** for teams
- Led development of Kofi's Fire, an **award-winning website** (React/Next.js), recognized by the Museum Association of New York

Wild Earth ***Feb 2022 - Dec 2022***
Front End Engineer Remote, San Diego, CA

- Designed and implemented a product quiz for a Series A pet food startup, valued at $35M
  - Quiz captured email from 85% of visitors and **drove 45% of visitors** to new subscription purchases, generating over **$20K in new revenue** per year
- Built custom WordPress Gutenberg Block functionality for content creators, **saving an estimated 20 hours per week** in communication/development costs and facilitating A/B testing
- Assembled and **developed component libraries** from the ground up of over 60 components utilizing atomic design principles

Omniome ***Feb 2020 - Dec 2021***
Research Associate and Developer San Diego, CA

- Engineered a new DNA sequence **remote monitoring tool** for a Series C biotech startup, **saving ~1,000 hours per year**, using **JavaScript/HTML5/CSS3/SASS**
  - Monitored reagent use per machine to identify excess and catch 2 leaks early, **saving over $10K.**
- **Automated the analysis of DNA sequencing metrics** to produce graphical output and data summaries, by writing **Python** scripts, **saving 8 hours per week**
